

Austrian Bridge Construction

Overview

The new Aurach Bridge is 50m-high and 420m-long, with piers foundations resting on bored piles more than 30m-deep Austria's new Aurach Bridge construction is now complete. The work involved building the new bridge as well as demolishing the old. On 14 May, the HABAU GROUP, PORR and ASFINAG celebrated the transverse moving of the highest bridge on the A1 West Autobahn. It is frequented by around 50,000 vehicles a day at peak times. One of the many challenges posed by this flexible suspension bridge were the expansion joints. The large rotations of up to $\pm 58\text{ ‰}$! at the ends of the support structures called for a custommade. New construction of the Jausern-Bridge as a trough bridge with reinforced concrete abutments Project planning, execution planning, tendering, construction supervision Construction as a truss bridge to preserve the ancient appearance of Kaprun Castle, with a clearly visible timber structure made of.
