

## Cable tray bent

### Overview

Click "Calculate" to see the minimum bending radius and the recommended standard tray bend radius (300mm to 900mm) required for safe installation. Tray bend radius must be  $\geq$  minimum cable bend radius. Use the largest cable diameter in the tray for calculation. Always select the next higher standard. Characteristic of this steel type is that - prior to mechanical deformation - it is given a zinc coating by means of a continuous dipping process. This zinc coating is easily deformed. A cathodic action occurs on cut surfaces (up to 1. An adjustable bend with 30°, 45°, 60°, 75° & 90° configurations is also available for medium and heavy duty trays up to 300mm wide. Materials and finishes available are mild. MRF medium duty 25mm height | Adjustable bends | !.
