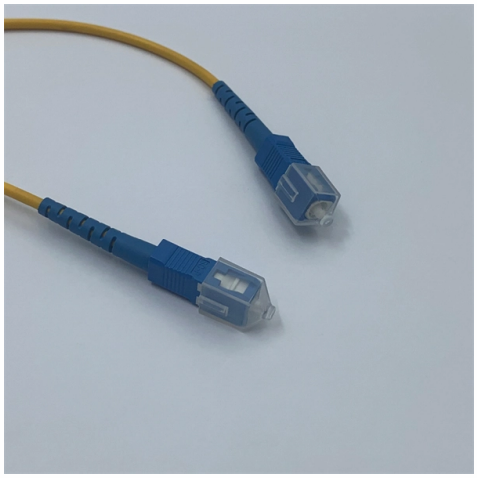
Cable tray specifications changed



Overview

31 (C) now aligns with the Code's broader language (like Article 392), allowing these smaller conductors and detailing how to calculate ampacities, the number of conductors permissible in cable trays, how to size cable trays correctly by width, layering or. The updated section 690. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. In this installment of our Code Corner series, Ryan Mayfield focuses on the 2023 National Electrical Code (NEC) changes concerning cable trays, particularly section 690. Historically, the NEC has allowed cable trays, but has lacked specific guidelines for sizing conductors and using smaller. Is your cable tray system optimized for safety, dependability, space and cost savings?

Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and. association representing the major electrical equipment manufac-turers in the U. NEMA VE-1 has been harmonized with the Canadian Standards Association (CSA) standard for cable tray (CSA C22.
