

Can the distribution box be moved horizontally

Overview

The distribution box shall be installed firmly, horizontally and vertically, and the vertical deviation shall not be greater than 3 mm; in case of concealed installation, there shall be no gap around the distribution box, the edge around the panel shall be close to the. The distribution box shall be installed firmly, horizontally and vertically, and the vertical deviation shall not be greater than 3 mm; in case of concealed installation, there shall be no gap around the distribution box, the edge around the panel shall be close to the. Usually, groups of objects can be distributed evenly (horizontally or vertically) by selecting all groups you'd like to spread evenly, and then picking the respective “distribute” option from the “aligment” submenu in the menu that pops up. In this case, all I get offered is to ungroup everything -. The Distribute feature ensures that selected objects are evenly spaced either horizontally or vertically. This is particularly useful when you have multiple objects that need to be aligned in a row or column with consistent spacing between them. It only let's me do so when I specify auto layout direction.
