

## Can the pigtail box be left outdoors in winter

### Overview

They are definitely garden items to never leave outside in winter. If these are left outside for too long they will crack and split before eventually breaking, leaving your plant's roots exposed and your plant pots destroyed. However, if your generator is stationed outside, you may wonder whether it can withstand freezing temperatures, snow, and moisture. So I'd think you will get some moisture problems with mold and mildew from the air. Pigtails in a panel are fine. Wire-splicing and pigtailing within a loadcenter cabinet (panel enclosure) is expressly permitted by NEC 312. 8 (A), and is quite safe (provided the splices are made up properly, of course): (A) Splices, Taps, and Feed-Through Conductors. The wiring space of. Even a mild winter climate can ruin your belongings if they are left outside.
