

China Tower Company builds communication towers

Overview

China Tower Corp, a Beijing-based mobile communication infrastructure company that runs most of the country's telecom towers, recently announced that it had upgraded 250,000 telecom towers nationwide into "digital towers" supported by a vast network of 2.1 million tower sites across the country. From telecom operators and infrastructure companies to overseas contractors, many rely heavily on Chinese manufacturers to supply high-quality. State-owned China Tower is the world's largest tower operator, according to Inside Towers Intelligence. China Tower's primary Telecommunications Service Providers (TSP) business refers to its core operations providing infrastructure and services primarily to China Mobile, China Telecom, and China. In 1986, Qinhuangdao completed the commissioning of China's first mobile communication base station, a landmark event that ignited the flames of China's booming communication industry like a spark. Just one year later, in 1987, Guangzhou built its first wireless base station, officially declaring. The China Telecom Towers Market Report is Segmented by Ownership (Operator-Owned, Independent TowerCo, Joint-Venture TowerCo, MNO Captive), Installation (Rooftop, Ground-Based), Fuel Type (Renewable-Powered, Grid/Diesel Hybrid), and Tower Type (Monopole, Lattice, Guyed, Stealth/Concealed).
