

Current Status of Fiber Optic Communication Development in the European Union

Overview

Fiber Deployment in Europe 2025: Where We Stand and What's Holding Us Back As Europe pushes toward its Digital Decade 2030 targets, fiber deployment has become a national priority across the continent. But despite ambitious goals, progress in FTTx and FTTH infrastructure. Advanced digital network infrastructure and digital services will be key in shaping the competitiveness of many European Union (EU) sectors – among them manufacturing, energy and healthcare – in the near future. In an increasingly technology-dependent society, a better digital ecosystem is essential to empowering citizens and working towards a more. FTTH deployment adoption in Europe has been on the rise since 2017 due to the fact that it is the most reliable form of connectivity in terms of durability and longevity. In 2025. The Fiber To The Home Council Europe (FTTH) has published the latest edition of the European FTTH/B Market Panorama, produced by market analyst firm iDate. Penetration rates are trending downward a rained, given the lack of operational liquidity and deteriorating market appetite to fund. They might theref e continued to provide limited funding in support of these new.
