

DCN Access Switch

Overview

These fully managed switches can provide advanced Layer 2 features as well as optional Power over Ethernet Plus (PoE+) power. It is ideal solution for enterprise and carrier access . Enterprise Switches are a line of advanced network switches designed specifically for large enterprises. These devices are the key to maintaining a reliable and efficient network infrastructure that supports large amounts of data and multiple devices and users High bandwidth: Enterprise-grade. On October 23rd, local time, DCN proudly introduced ImCloud, our innovative cloud platform, with the invaluable support and collaboration of our esteemed partner, DCN Europe. By using an agile non-blocking architecture, “cloud stone” chassis series can meet fast-changing requirement on cloud computing, IoT and data center, realize a rapid deployment and lower the CAPEX for ISP and. DCN S4600-SI series are full GbE standalone switches provide enterprise-class access for campus and branch applications. it integrates advanced management and security. Data communication network (DCN) is built for the network management system (NMS) to implement operation, administration, and maintenance (OAM) on the network elements (NEs). On large-scaled networks with DCN configured, the NMS remotely manages and controls all NEs through the gateway network. Chapter 1 provided an overview of the CloudEngine series data center switches.
