

Distribution Box Live Wire Connection Method

Overview

Live (L) Wire Connection: In a distribution box setup, the incoming live wire (also known as phase or hot wire, denoted as L or Line) connects to the line terminal of the circuit breaker. This serves as the primary source of electrical energy from the mains supply. Whether you're a professional or a DIY enthusiast, understanding the correct procedure can prevent accidents and ensure optimal performance. Whether it is residential buildings, commercial facilities or industrial sites, the Distribution board is a safe system designed for house or building that included protective devices, isolator switches, circuit breaker and fuses to safely connect the cables and wires to the sub circuits and final sub circuits including their associated Live (Phase) Neutral and Earth conductors. **Neutral (N) Wire Connection:** For.
