

## Distribution box lowest distance from the ground

### Overview

Outdoor boxes need to be at least 3 feet above the ground. This keeps them safe from water and dirt. These heights follow rules like BS 7671 and IEC 60364-5-52. These standards make sure the box is easy to. According to the "Code for Acceptance of Construction Quality of Building Electrical Engineering" GB50303-2002, the vertical distance between the bottom surface of the fixed stainless steel enclosure ip67 and the ground should be greater than 1. The bottom surface. Distribution box and switch box should not exceed 30 meters. Get a licensed. Choose the right box based on environment (indoor/outdoor), load capacity, and durability. Ensure safe placement: install in dry, accessible areas with good ventilation and at appropriate height (typically ~1.26 m). 2 (10 AWG) ground wire must be used, and in all other markets a 6 mm<sup>2</sup> must be used. The fixing method should be firm and reliable to avoid movement or tilting of the box due to vibration or collision.
