

## Does the router need to be upgraded to a 100M fiber optic connection

### Overview

Will I need to buy a new router?

Possibly yes. You might find that your current router is not compatible with fiber internet speeds, so you'll need a model that can deliver the 'fiber goods.' Hello I am considering upgrading to Full Fibre 150 from superfast and was enquiring what is involved?

Do I require a new router, which comes with all the complications or is it just a cable connection to existing router?

What's this?

28 Jan 2025 01:11 PM Posted by a Superuser, not a Sky employee. So for anyone who has upgraded to fiber: Did you buy a third-party modem without a wifi router?

Did your ISP let you turn off the wifi portion of the modem?

Are there any other considerations I'm missing with upgrading to fiber?

Archived post. New comments cannot be posted and votes cannot be cast. Full Fibre connections involve fibre-optic cables running directly into your home, delivering higher speeds and more consistent connectivity than traditional broadband. Sometimes ISPs may offer these as part of a sign-up promotion, while other times they may. With 100M optical fiber broadband, can I change the gigabit router to inc...
