Today, already with over 500 standard, application optic solutions to leading manufacturers, especially in the semiconductor, the consumer electronics and the car electronics industry, as well as for food packaging and small plastic parts production. The requirements for fiber optic solutions can be very demanding particularly for applications wi. attention enhances productivity and reduces maintenance costs. Tested resistance against aggressive chemicals, extreme temperatures, low pressure (vacuum), mechanical abuse Housing construction preventing protruding cables (e.g. square shape, side view models) High flex fibers with 1 mm bending radius for close wall mounting Robot fibers tested with more than one million bending cycles Protective metal or plas. LED power control against aging effects Auto-threshold control for enhanced compensation of power decrease, e.g. through dirt on lenses With minimal time required for mounting the fibers the productivity can be enhanced for machine builders and the easy setting of the amplifiers simplifies production changes for machine users. Easy-teach amplifiers or manual adjusters Easy manual adjustment by potentiometer One-button auto teach for in-process dynamic teaching, or two-point object.
