

How much does a 10km 10g optical module cost

Overview

The average 10G SFP price typically falls between \$10 and \$300, depending on the module type, transmission distance, and brand. For most standard enterprise and data center deployments, the practical buying range is much narrower—and far more predictable—than many price lists. The price of a 10G SFP+ module typically ranges from low double digits to several hundred dollars, and in some cases even higher. Check real-time Huawei 10G SFP module price online. Global Shipping & Tech Support. As network technology advances rapidly, 10G networks are becoming mainstream. Svelol's 10G SFP+ optical modules incorporate the latest optical chip and packaging technology to deliver lower power consumption.
