

How to clean dust from a home network cabinet

Overview

Soft, lint-free cloths, gentle vacuum cleaners equipped with HEPA filters, and compressed air cans are excellent choices for removing dust without leaving residues or causing harm. In addition to regular light cleaning, scheduling deeper cleans every few months is essential. This involves both the interior and exterior of the cabinet, focusing on areas that are prone to dust accumulation. Using anti-static wipes and specific cleaning solutions. What is the best way to control dust?

There are many many holes in the rack and it ends up with thin layer of dust in a day after I clean it. Should I just add some foam filters on all the holes?

Change inlet/exhaust configuration?

Any other better ideas?

Positive air pressure So only exhaust, no. Here's a guide on how to properly maintain and clean network cabinets to ensure the longevity of your IT equipment.
