

How to convert fiber optic cable to gigabit switch

Overview

Connecting a fiber optic cable and a copper cable to a media converter can be done in the following ways: Connect Switch B's copper connection to the fiber media converter's RJ45 port with a UTP cable. This allows networks to extend beyond the 100 m copper limit while gaining higher bandwidth and resistance to electromagnetic interference. In the illustrated setup, each LAN links to a. This installation note provides the technical specifications and installation instructions for the Gigabit Ethernet Converters (GBICs) that you install in Catalyst 4000 or Catalyst 5000 series Gigabit Ethernet ports that accept GBICs.
