

How to disable PoE on a TP-Link switch

Overview

For TP-Link PoE switches, except for Unmanaged Switches, we can disable/enable PoE power on individual ports under PoE > PoE config, and PoE Status of PoE port is enabled by default settings. There is a PoE management for the multiple ports model. About the PoE, I'd like to comment that our switch is IEEE 802.3af. I am not sure why would your. Can I Disable PoE feature on an individual switch port via the Omada app?

I essentially want to completely turn off the wifi radio (no broadcast at all at night). I am currently using the OC300, Omada Router and Jetstream 10 port POE switch. Please Help!!! You can put a schedule on the SSID. Download the Easy Smart Configuration Utility from. Off: The PoE Auto Recovery function is disabled. On: The switch will constantly detect the working status of a PoE powered device (PD).
