

Huawei Access Layer PoE Switch

Overview

The Huawei S5735-L48P4X-A is a Layer 3 (L3) simplified gigabit Ethernet switch that combines high-density access with robust Power over Ethernet (PoE) capabilities. Huawei's comprehensive portfolio of products and solutions enables you to realize smooth digital transformation and rapid growth of virtualization, Big Data, and cloud services. Huawei switches already help customers achieve success in industries such as finance, Internet, retail, education. High-power PoE, multigigabit speed, and AI-driven operations for smart campuses, IoT corridors, and Wi-Fi 6/6E/7 edge networks. 3bt Type 3) and 90 W. CloudEngine S5736-S Series Switches are standard multi-GE access switches for the Wi-Fi 6 era, featuring 24 downlink ports, four 10 GE SFP+ uplink ports, and one extended slot. The switch may be PoE+ capable. Within the fast-paced world of industrial networking, the S5735-L48P4X-A Huawei switch provides a "simplified" yet powerful architecture designed to meet the rigorous demands of 48-port PoE+ connectivity. Part of the CloudEngine S5735-L series, this model integrates 48 fixed 10/100/1000Base-T. This guide explains how Huawei PoE switches enhance performance, improve energy efficiency, and integrate seamlessly with PoE access points and PoE Wi-Fi APs, helping enterprises achieve higher network ROI. The modern workplace is no longer confined to wired desktops.
