

Integrated Management System for Data Center IDC Construction

Overview

By integrating Automated Logic's WebCTRL building automation system and Nlyte Software's industry-leading data center management software, IDCM gives you the control and visibility to increase energy savings, reduce costs and ensure uptime. Integrated Data Center Management (IDCM) is deep integration between data center critical facilities infrastructure, the resources (e., servers, switches, assets, etc.) within the data center, and the application workloads running there. For organizations navigating mandatory ESG reporting, escalating energy costs. Your IT teams face a daunting challenge: build a modern data center architecture for your mission-critical environment - on time and on budget. IDCS from SHI helps you turn your complexities into easy wins: • Accelerate your time-to-market with end-to-end integration.
