

Luxembourg Airport Eye Gauge Incident Blind Spot 1m

Overview

On Friday, 13 June 2025, a structural anomaly was detected on the center line of the runway at Luxembourg Airport, prompting an immediate and precautionary closure of the runway to ensure the safety of all air traffic operations. “Blind Spot” is a type of human error. Unlike other uses of the term, in air traffic control it refers to the failure to detect a problem (conflict) right in middle of the controller's field of view. Specifically, controller blind spot loss of separation events are typically. Production of this SKYclip was led by Tzvetomir Blajev supported by EUROCONTROL and industry safety experts as well as the Flight Safety Foundation European Advisory Committee.
