

Method of covering above-ground electrical distribution boxes

Overview

Covering up utility boxes typically involves using some type of outdoor enclosure such as fencing, shrubs, screened louver panels, lattice, trellis, and even large rocks. Depending on the location and aesthetics of the property, certain types of enclosures may be more fit. Outdoor electrical boxes are essential components of any property, providing access to power for various exterior applications, such as lighting, outlets, and equipment. Some boxes, like gas, water, and cable, can be covered if they remain accessible for maintenance. However, electrical. Utility boxes, whether they are cable pedestals, junction boxes, or large pad-mounted transformers, serve a necessary function but often create an eyesore in the landscape. These metallic or plastic enclosures house sensitive equipment that delivers essential services like electricity, gas, and. Fortunately, you can hide them through landscaping and if you are looking for ideas to do just that, here is a roundup of landscaping ideas to hide utility boxes. Wood screen Wood never falls short of purpose and in this one, repurposed wood is made into a slatted screen for the utility box.
