

National Standard Markings for Distribution Boxes

Overview

ISO 780:2015 specifies a set of graphical symbols conventionally used for marking of distribution packages in their physical distribution chain to convey handling instructions. These universal pictograms, properly placed on the boxes, serve as guidance for the perfect handling of the cargo, since they are not accompanied by written words and are understandable anywhere in the world. In addition, they are standardized according to ISO 780:1997. ISO 780:2015 is applicable to packages containing any kind of. Material procured, received, stored and issued by DLA requires proper care to ensure that the items arrive and remain in a ready-for-issue condition. The warfighter must receive. bodies). The work of preparing International Stan t e right to body federation of national be interested in on a ds is normally standards organizations, electrotechnical coll b rates standardization. Its color should stand out clearly from that of the package; black RAL 9005 paint is used. Alternatively, it. The identification of these types of clauses is based on the document "ISO / IEC Directives, Part 2 - Principles and rules of structure and drafting of ISO documents "as well as on a constantly enriched list of verbal forms.
