

## Network rack pooling price

### Overview

75 inches) or per full/half/quarter rack; typically \$79-\$300/month per 1U depending on location and market tier. Fixed all-in kW rate (~\$250/kW/month, covering space, power delivery, and cooling) or metered against the underlying utility rate. Quoted per rack unit (1U = 1. These include the size of the installation, the complexity of the equipment, labor costs, and infrastructure requirements. 94 per kW per month for deployments in the 250 kW to 500 kW range. These. This can mean a bill of a few hundred dollars a month for a single server, or it can climb into the tens of thousands for high-density private cages. Instead of the standard 8 kW, you can request 20 kW, 30 kW, or even 60 kW. This colocation solution will be easy and beneficial for companies that want to consolidate high-performance. Average cost per rack in colocation ranges from under \$500/month to well over \$5,000/month, and the gap isn't random.
