

Norwegian AI Server

Overview

OpenAI has announced Stargate Norway, its first AI data center initiative in Europe. Stargate is OpenAI's overarching infrastructure platform and is a critical part of our long-term vision to deliver the benefits of AI to everyone. Render image of a fictitious server. Norwegian server manufacturer Nscale is building a supercomputer for OpenAI in northern Norway. The first phase is due. OpenAI's Stargate Norway, a renewable AI data centre backed by Nscale, Aker and Nvidia, will deliver sovereign compute infrastructure with 100,000 GPUs. Stargate Norway is OpenAI's pioneering AI data centre project in Europe under the 'OpenAI for Countries' programme – seeking to expand compute. Artificial intelligence (AI) represents vast opportunities for us as individuals and for society at large. AI can lead to new, more effective business models and to effective, user-centric services in the public sector. We have:. The data center will hold 100,100 NVIDIA GPUs and use entirely renewable energy, if all goes according to plan. The facility, to be built in Narvik, represents.
