

## Quality Standards for Optical Cable Lines

### Overview

This article introduces and explains the scope, application, and practical relevance of the eight most widely used fiber and optical cable standards: ITU-T G. 657, IEC 60793, IEC 60794, TIA-568. While the US relies heavily on TIA/EIA standards (like TIA-568), most of the rest of the world runs on ISO/IEC. As an importer, knowing which standard to specify on your Purchase Order (PO) is your first line of defense against liability. This is not a boring textbook list. Fiber optic networks rely on a foundation of rigorous international standards that define. What Is a PM Patch Cable?
