

Router s fiber optic blue light stays on

Overview

If your router is on, as indicated by the blue light, but you can't access the internet, the best way to resolve the issue is to perform a hard reset. This process clears all caches, refreshes the RAM, and restarts the router. Typically, these lights correspond to various router functions such as power. The tables in this article provide detailed information about the possible appearances of the LED lights on each device, the possible causes of each state, and what you should do. Your router can't hold a steady connection. It keeps trying, failing, and trying again. The good news?

You can usually fix this yourself in about ten minutes, maybe less. Your Quantum Fiber router uses different colored lights to tell you. The LEDs on your modem, optical network terminal (ONT), router, or modem/router combo (gateway) are most likely blinking because they're communicating what the device is doing, or there's an error. And knowing the Modem router lights meaning can save you hours of troubleshooting frustration and help you diagnose problems before they completely.
