

Syrian Optical Cable Sales

Overview

Five major regional Internet companies are bidding for Syria's \$400-\$500 million SilkLink overland data cable project. Syria is expected to award a national fiber optic network contract next month, following final bid submissions from regional telecom companies. Sources cited by Middle East Eye indicate that Saudi Arabia is considering redirecting the route of its fiber optic cable connecting the country to Greece to pass through Syria instead of Israel, as initially planned. This move comes amid political differences between Riyadh and Tel Aviv over the route. 6Wresearch actively monitors the Syria Active Optical Cables Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook. Our insights help businesses to make data-backed strategic decisions with ongoing market dynamics. Imports In 2022, Syria imported \$255k in Optical fibres and cables, becoming the 190th largest importer of Optical fibres and cables in the world. The SilkLink project provides a significant boost to Syria's future, significantly impacting connectivity and development. This section explores how high-speed internet can boost the economy and improve social and cultural aspects. High-speed connectivity offers numerous benefits. Since day one, our mission has
