

TP optical transceiver module

Overview

The TL-SM5110-SR is designed to extend transfer distances based on 10Gbps Ethernet connectivity. It is a 10GBASE-SR high performance 850nm multi-mode SFP+ transceiver. It supports full duplex, 10G Ethernet connections up to 300m or 33m with 50/125 μ m or 62. High-quality metal casing ensures strength and reliability for a long time, maintaining a stable connection in a wide range. The GPON ONU Stick transceiver module is designed with a simpler and more cost-optimised architecture that ultimately reduces the number of devices deployed and managed in a network. You can use this module with other device brands! The single-mode SFP+ transceiver supports full.
