

The router is unusable after the fiber optic connection was changed

Overview

The fiber modem may not connect to the internet, display error messages, or have a slow connection speed. Check the power and connection cables for the fiber modem and router. The router automatically changed its IP address to 10. I've assigned drive letters to folders in my NAS so I can access it. But my computer didn't receive a valid IP address from the modem, so I manually set a static IP with the following. My internet service provider is having an infrastructure overhaul, switching every home to fiber optic from coaxial. The problem that I'm having is that this new modem doubles as a. This morning my ISP upgraded my Internet connection from a standard coaxial cable and Cisco modem to a fiber optic cable and Hitron modem Model Name NOVA-2004. Despite multiple attempts, the Archer AX6000 v1.
