

Thickened Transparent Fiberglass Tube for Floating Tail

Overview

Cylindrical straight tube, translucent, no taper, no floating color paint, length about 45cm. You can cut it to an appropriate length according to your needs, coat the eyelet paint and use it as a soft tail float tail, or use it for thin tail float and thick. Tube length: 31.5 inch / 80cm, Fit for ant 9ft 4pcs fly rods or shorter. The transparent fiberglass tube with aluminium tube cap. 2mm) Outer diameter. This Clear Float Tube is a perfect example of this innovation, as it is a simple solution to a problem that match anglers have faced for many years. The company was established by Ken Middleton and his wife Gwen in the late 1960s and it remains a family business to this day. Fiberglass has additional design features like RF transparency and by itself it isn't conductive like carbon fiber. Strong and lightweight glass tubes are perfect for hundreds of applications in different fields: engineering, robotics, film, photography, architecture, nautical, aerospace, cleaning and all kinds of sports use them.
