The success of new technical efforts and negotiation initiatives with U. Chargé d'Affaires in Venezuela, John Barrett. At the turn of the century, the 30-second elevator pitch for Venezuela's electricity sector was compelling: one of the best integrated electricity systems in Latin America, with more than 30 GW of state-of-the-art hydroelectric and thermal generation, around 30,000 kilometers of transmission lines. Venezuela's energy sector remains a paradox: rich in resources yet crippled by political instability and infrastructure decay. The country holds the world's largest proven oil reserves at 303 billion barrels and natural gas reserves of 200 trillion cubic feet, a fortune in hydrocarbons that could. In Venezuela, as around the world, the provision of reliable and affordable electric power is essential for the availability of vital humanitarian services such as healthcare and water supply, as well as enabling public transport, education services and the smooth functioning of the economy. In a meeting held by potential providers and financiers for Venezuela's electric industry, including Siemens Energy and GE Vernova, the question of how to get paid to shore up the country's deteriorated grid was the main concern.
