

West African Grid Cable Management System Companies

Overview

The West Africa Cable System is a critical infrastructure that connects several West African countries to the global internet network. It spans over 14,000 kilometers of underwater cables. We offer extremely innovative solutions for even the most arduous & complex cable support application that would fall outside the scope. We build and operate critical infrastructure for intra-African and international connectivity, enabling your business to expand seamlessly across borders, access new markets and deliver reliable digital services at scale. It was initially designed with 128 wavelengths per fiber pair, running at 10 Gbps per wavelength, and initial. Headquartered in South Africa, MTN Group is a multinational mobile telecommunications company with a vast network throughout the Middle East and Africa serving over 230 million subscribers. In support of the focus on data, MTN has invested a total of USD 90 million in the subsea West Africa Cable.
