

What are the export trends for optical fiber and cable

Overview

The global fiber optics cable market is experiencing substantial expansion, driven by escalating demand for high-speed internet, the ongoing rollout of 5G networks, and the rapid growth of data centers worldwide. Data Bridge Market Research analyses that the global optical fiber cable market which was USD 5,896.39 million in 2022, is expected to reach USD 10,896.39 million by 2030. The market is segmented by Application (Long-Distance Communication, FTTx, Local Mobile Metro Network, CATV, Others), by Types (Multi-Mode Fiber Optics Cable, Single-Mode Fiber Optics Cable), by North America (United States, Canada, Mexico), by South America (Brazil, Argentina, Rest of South America). Fiber optic cables are network cables containing strands of glass fibers inside an insulated case. These are mainly used as a medium for telecommunications and computer networking. They are also used as light guides, imaging tools, and lasers for medical surgery, and as wiring in aircraft. The fibre optic cables that carry the data by the use of light signals have a much greater advantage over traditional copper cables because they have a higher bandwidth, faster connectivity, reliability, and less signal gets lost due to long distance.
