

What does splitter 14 mean

Overview

A NEMA 14-50 Y splitter is a heavy-duty adapter that connects one male 14-50P plug (the “input”) to two female 14-50R outlets (the “outputs”). This allows two devices to plug into a single 14-50 outlet, effectively “splitting” the power source. The most common application is the input from an active. Check each product page for other buying options. Need help?

The 14 AWG SJT Power Cord Splitter is an essential tool for efficient power distribution in various settings. Smooth, continuously welded seams ground smooth. Door stiffeners are provided where required for increased strength and rigidity. The Smart Splitter is widely eligible for utility rebates across the US and Canada! We partner with utility companies to provide access to EV charging and home electrification without the need for panel upgrades and rewiring. Check Your Rebate → See available rebates and tax credits for your area.
