

## What is an intelligent low-voltage distribution box

### Overview

SP-JP intelligent low-voltage integrated distribution box is a distribution transformer integrated distribution cabinet integrating power distribution, metering, protection (overload, short circuit, leakage, overvoltage, undervoltage and phase shortage, etc.), automatic. Our solutions for smart low voltage electrical installations are tailored to maximize continuity of service, energy efficiency and allow easy upgrades all along the lifecycle of the system. It is applicable for the power distribution system with AC 50Hz and rated voltage of 400V in urban network, agricultural network. The intelligent distribution box introduces mobile internet technology, which can be remotely accessed through mobile phones PAD. Real time monitoring and management of various electrical lines in the home by computers, timely detection and handling of electrical faults. The traditional power distribution network consists of a master station, residential area.
