

What router should be used with a 1000m fiber optic connection

Overview

Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium price. However, you need a router capable of supporting multi-gig speeds to get fiber internet connectivity. I worked with the Cybernews research team to review and compare different routers and give. Selecting a single router can be challenging, as there are most likely many that fit the requirements you want. Main search terms like best router for fiber internet, fiber optic router, best wifi router for fiber optic, best fiber optic router, and best modem for fiber internet lead your. Speed should match the fiber internet plan to ensure fast downloads and smooth streaming. Future-proofing improves network longevity since Wi-Fi 6E and Wi-Fi 7 routers.
